

SERVICES *REPAIR SERVICE / SPARE PARTS SERVICE*

. . . to find a quick solution to problems

If a cooling unit does not operate correctly the entire machine tool often comes to a standstill!
To remedy production stoppages, it is therefore of paramount importance to quickly solve any faults and failures in cooling units. That is why today we offer our customers the following services:

Rapair service in Däniken

At our headquarters in Däniken we repair and revise any cooling units ever built by BURN in a professional and lasting way which, as a general rule, takes one to two working days.

- Please contact us for a non-binding cost estimate.

Spare parts service

Our extensive spare parts warehouse enables delivery of the most important required components for all (current or old) BURN cooling units often on the same day as the order. To do so, we need both the **Model** and **Serial number** of the corresponding cooling unit.

- Please contact us to receive an immediate offer for the required spare part.
-
