WATER/WATER HEAT EXCHANGERS *WWP* SERIES

. . . appropriate for the water chillers in the ***WK*** series

The units in the ***WWP*** series are compatible with the corresponding models of water chillers from the ***WK*** series and therefore, if necessary, can also replace these if required at a later date.

WWP 1800 . . . 2800

WWP 3500 . . . 4500

WWP 5800 . . . 6500

Characteristics of the standard:

DESIGN

- Analogue structure like the water chillers in the ***WK*** series
- Optimum accessibility to electric boxes and components for maintenance
- Cooling water tank is easy to open for maintenance/cleaning
- High mobility through rollers (2x steerable, 2x fixed)

COMPONENTS

- Plate heat exchanger made of stainless steel
- Closed, unpressurized cooling water tank made of stainless steel
- High performing immersible pump
- Electronic PID temperature controller with digital display
- Display of warnings/faults using potential-free contacts
