

LIQUID CHILLERS *SPECIAL MODELS*

. . . Yes, we chill !

For special requirements we are also in the position to develop and build customised *SPECIAL LIQUID CHILLER MODELS*. These can, for example, be units:

- with individual dimensions
- with special housing shapes
- for special technical requirements

Examples of customised liquid coolers:

WK 4003 - C25

< Water chiller for installation in a machine tool with a cooling capacity of 4.0 kW (Active cooler)

Air/water heat exchanger for installation in the the same machine (Passive cooler 4.0 kW, as cost-saving option)

LWP 4003 - C25

LWP 1900 - N15

< Air/water heat exchanger for built-in assembly in a processing centre, cooling capacity 1.9 kW

Emulsion/oil chiller for cooling fluids contaminated with grinding swarf, 4.5 kW cooling capacity

EK 4501

WP 2800 - K5

< Air/water heat exchanger (Passive cooler 2.8 kW cooling capacity, instead of the water chiller WK 2800)

Water chiller without electronic control system, 5.8 kW cooling capacity (regulated by the plant to be cooled)

WK 5806 - C25
