

LIQUID CHILLERS

. . . for cooling different liquids in industry

BURN liquid chillers are used all over the world and ensure reliable cooling and highly precise thermal stabilisation of different production processes in industry.

We currently offer five different ranges with standard units with a modular structure which enables great flexibility with regard to customised adaptations and special requirements.

The five standard ranges:

- WASSERKÜHLER* SERIES easy and tried and tested
- REACTION* SERIES high performing and flexible
- MINI* SERIES compact and economic
- SLIM* SERIES narrow and sophisticated
- PANEL* SERIES the new one

Special models:

In the event that our standard units cannot satisfy all special requirements we design and manufacture the corresponding special model in accordance with your specific application.
